## AMERICANS WITH DISABILITIES ACT REQUEST

To Whom It May Concern:

This is an official request under The Americans with Disabilities Act (ADA) that you cease the legislative process to change the Over-the-Air Reception Device (OTARD) rule, because I am learning that microwave radiation exacerbates my condition. I am diagnosed with stage four colon cancer. Microwave radiation has profound biological effects such as oxidative stress and DNA damage. The microwave radiation from the small cells and antennas will be pulsed which has a more profound effect on the body which is made up of cells. Due to my having cancer, my cells have the propensity to have abnormal proliferation and this close proximity to microwave radiation would increase abnormal cell activity in my body.

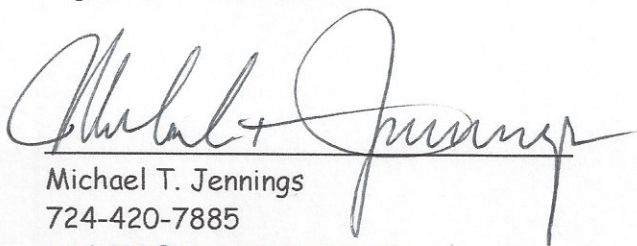

My family has taken steps to minimize our exposure to EMFs and microwave radiation by hardwiring our computers and not using WiFi. Hardwiring and fiber optics are a better solution, and they are faster than WiFi to boot. We have been led to believe the opposite. We do not use a microwave oven either.

If the OTARD rule is changed, wireless companies would be allowed to install RF microwave antennas on private homes, which would mean chronic 24/7/365 exposure. Chronic exposure to microwave radiation would increase the pain in my joints and muscles; disturb my nighttime sleep pattern, and cause fatigue. I help my wife with our disabled son and if I was chronically exposed to wireless radiation, I would not be able to fulfill my portion of care.

I implore you **NOT** to change the OTARD rule so as not to affect the health of US Citizens, which includes me and my family.

Please inform me of your intent to comply with this ADA request.
